Local devices and resources (printers and drives)

Check the box next to **Printers** so your home printer appears as an option when you print from the Remote Computer.

Check the box next to **Clipboard** so that things you copy on your Home Computer (using "Ctrl+C" or the "Copy" menu option) can be pasted into documents on your Remote Computer.

Click the **More** button for more options.

Save your connection settings

Once you have your settings just right, save them as an RDP le to your Home Computer's desktop or documents folder.

1. Go to the **General** tab and click the **Save As...** button.

- 2. Give your connection le a name, and choose where to save it.
- 3. For future connections, just double click the RDP le (wherever you've saved it) to connect immediately with your saved settings.

Note: We do not advise that you click the "Allow me to save credentials" checkbox. Future password changes will render your settings and RDP file unusable.
