

Windows 10 File Explorer

File Explorer allows you to browse, search, and manage files and folders. Typical locations include:

- Downloads
- Documents
- Desktop
- OneDrive
- Recent files
- Work Folders
- Music
- Pictures
- Network
- This PC

There are two ways to open File Explorer:

1. Click on the taskbar icon. To bring up the taskbar, press the **Windows logo key + E**.

2. Access the Start menu, click on the File Explorer icon. See More...
